What is Person Centered Planning?

Person Centered Planning is a process focused on celebrating the gifts, talents and dreams of a person. Planning assists a person with action steps to move closer to personal dreams and goals. It involves 3-4 sessions, usually held in the individual's home. Each person and their family invite friends, relatives and professionals to support the Person. Sessions are facilitated by two facilitators who listen, ask questions and use meaningful pictures and words to record graphically the desires and goals of the person.
